

Valence

Covenant

Covenants are interchain agreements. Permissionless digital institutions that enable humanity to collaborate with unprecedented scope and scale.

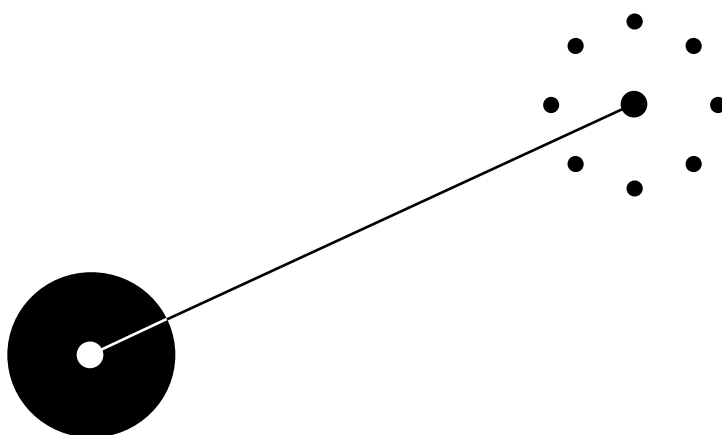

Create a covenant →

Rebalancer

Rebalancer is automated portfolio management. All who endeavor to grow the interchain are limited only by their own imaginations and the laws of physics, not by tooling or resources.

Rebalance portfolio →

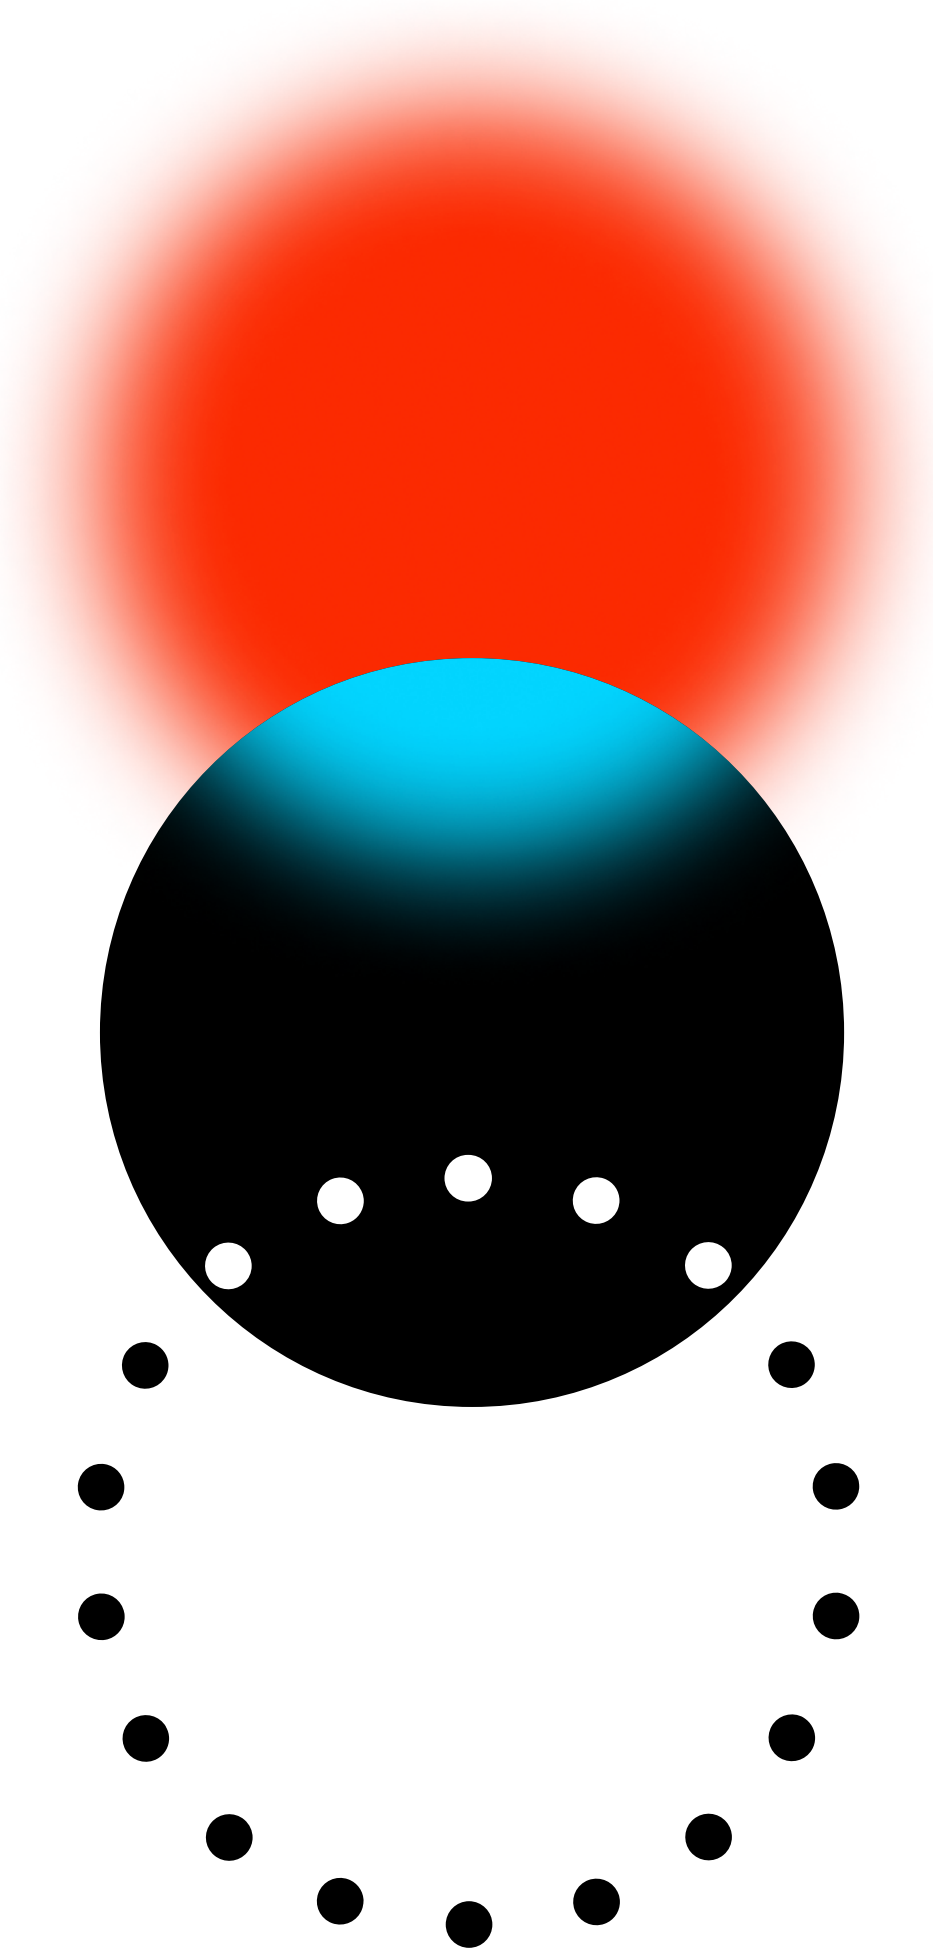

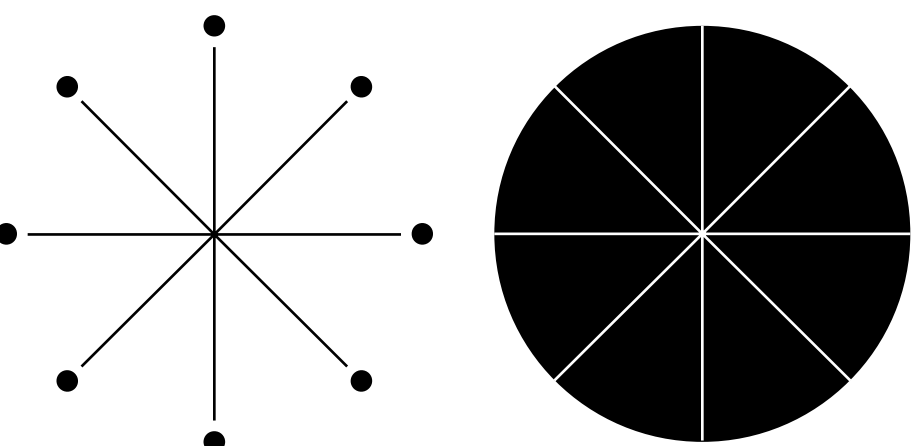

Creates tools for internet-native institutions

Interchain Guild

Free and open source software is the foundation of internet-native institutions. Valence develops the interchain guild to support essential public goods infrastructure.

Fund public goods →

Timewave

We architect institutions to bring long-term alignment across the interchain.
